## *Our Kitchen*

At El Encanto, we are dedicated to clean ingredients, sourced locally and in environmentally conscious ways. From freshly picked herbs to sublime halibut and king salmon caught fresh from the Pacific Ocean, El Encanto strives to use sustainable ingredients whenever possible. Drawing inspiration from different cultures, El Encanto fuses simple and modern culinary techniques to bring the most beautiful, vibrant and flavorful dishes to the table.

## *Magic Hour Origin Story*

Magic Hour was founded in Ojai, California where the sunset and sunrise create what we call the “pink moment.” There is reverence at dawn and dusk, there seems to be a stopping of time and a sense of presence to which we each naturally sync.

From this place, Magic Hour was born.

Magic Hour is the creation of Zhená Muzyka, the founder of Zhená's Gypsy Tea, author of *Life by the Cup*, and spirituality publisher. A seeker, potion maker, and lover of nature and magical humans, Zhená created Magic Hour to make a retreat available in each of your homes. Bringing together spiritual teachers and tea ceremony felt a natural way to bring more connection, love, and presence into our lives.

## *Transforming The World Through Tea*

Our botanical potions and transformational teachings bring you the world's finest mind-body-soul growth on the planet, offering the distillation of the sacred to you. Our purpose is to inspire you with beauty, connection, and love through daily rituals. We envision a world where everyone and everything is treated as sacred. We envision a world where lovers, friends, colleagues, and even opponents take tea time to create connection and compassionate understanding.

Through our ceremonies and teachings, we help to remove borders and fear — to create a world of love and connection. We are women who live as close to the land as possible in Ojai, California. We source our teas only from organic and biodynamic tea, herb, and spice gardens. Regenerative farming methods support the earth by helping reduce CO<sub>2</sub> and support the workers (who are mostly women and mothers) with fair wages, maternity leave, healthcare and education for their children.

## *From The Founder of Magic Hour Tea*

In the quiet, still moments  
When silence envelopes you  
Is when you realize  
The universe is as much within you  
As it is around and beyond you  
As the earth turns and the rising sun  
Fills your eyes, you understand the infinite  
Is you  
Oneness is elusive throughout the day  
Except at dawn and dusk  
When you are made aware  
of the motion of our spinning planet  
Moving in harmony with the universe  
These are the *Magic Hours*  
Where everything is possible
