PROGRAMME

DAY 1 – OCTOBER 8

10:00 – Welcome to La Residencia

10:15 – 11:30 - Stroll into the olive grove to harvest plants

Learn about the many aromatic herbs that grow in the Sierra de Tramuntana and their botanical uses before picking plants like rosemary, pine and cypress

11:30 - 12:30 - Set up the distillation process and enjoy refreshments

12:30 - 14:00 – During the distillation, discuss scents and different extraction techniques before feasting on a locally inspired lunch with scent pairing by Chef Guillermo Méndez. Each dish will be an ode to local aromatic herbs and plants.

DAY 2 – OCTOBER 9

09:00 - Transfer to Palma. Walk the short distance to Viti Vinci workshop

10:00 - 14:00 - Workshop: Create your own essence

During the activity you will learn how the olfactory system works, how information is received and communicated through scent, how perfume houses operate and the principles of perfumery. You will be presented with a palette of 15 to 20 natural aromas to discuss their olfactory profile, discover how they can be used in formulations and glean the aromachological properties of each. After a short break to enjoy infused fresh water and a glass of cava, you will explore avenues of inspiration that lead you to dream up your own formula. Once this is reviewed by the workshop leaders, you will blend the ingredients and bring your essence to life.

14:00 - Lunch in Palma

16:00 - Transfer back to Deià

ON VITI VINCI

Mallorcan scent scientists Viti Vinci cultivate aromatic and medicinal plants in a coastal sanctuary on the island.

The plants are picked by hand in harmony with nature's cycles and then distilled into exclusive, luxury fragrances that stimulate the senses, activate memories and evoke emotions.

Viti Vinci believes in the power of scent to reconnect people with their feelings, reminiscences and – ultimately – themselves.
